

INTERVENTIONS FOR READING FLUENCY

Pre-K to Grade 2

1

RAPID NAMING

Choose a semantic category (ie. letters, colours, occupations, etc.). For 30 seconds, students name as many words as possible within that category.

2

SPEED READING

Have students race to "beat the clock" when reading familiar passages, while maintaining word reading accuracy. If accuracy dips below 90%, instruct students to reduce speed until accuracy improves.
