

# When I use Word Prediction

## What I want:

- To spell words correctly.
- To write using proper grammar.

## What I need to do, in order for Word Prediction to work:

- Depending on the software, I may need to write the correct sound with the correct spelling at the beginning of the word.
- I need to know the different ways in which sounds are written and which ones are more difficult for me.

## To make the right choice:

- I stop, I look, and I think.
- I look at the words being suggested in the word prediction box.
- I can listen to the words being suggested with the voice.

## If I don't find the right word:

- I write the word again, slowly, syllable by syllable.
- Can the first sound be written in a different way? (for example, the sound /f/ can also be written /ph/).
- Have I written all of the sounds?
- Is the word I want to write an English word?
- Could the word be written as two words? Or could two words be written as one? (for example, " should not"/"shouldn't")
- Other: \_\_\_\_\_
